

# Myplant grows towards the 2022 edition

750 exhibitors have already been confirmed for the 2022 edition of Myplant & Garden, the international exhibition of horticulture, garden and landscape, scheduled at Fiera Milano from 23 to 25 February.

A total of 45,000 square meters of exhibition space and a further expansion is considered.

Hall 12 will be dedicated on the one hand to the world of cut flowers and home & garden decoration, on the other to greenery and garden care. The pad. 16 will mostly host the offer of services, techniques, flowers and potted plants, while 20 will host a wide selection of nursery products, landscape insights, proposals for sports fields, green maintenance and motorgarden.

For the motorgarden there is also an external demo area between halls 12 and 16.

"To date, the 3 halls are substantially full. The idea of the 'breakthrough' in a quarter pavilion arose spontaneously following the continuous demand for new spaces by companies. The dialogue with Fiera Milano for expansion is open and we are optimistic ", confirm the organizers.
