MYPLANT & GARDEN 2024

FEBRUARY 21 - FEBRUARY 23

MYPLANTECH, INNOVATION FOR GREEN COMPANIES

Innovating products, services and processes is a necessity for all supply chains.

With MyplanTech, Myplant is highlighting the best technologies and the most innovative solutions available to eco-friendly companies.

Energy efficiency, resource optimization, monitoring, reducing environmental footprints in the fields of farming, gardening and landscaping each have a space in an ad hoc path that winds through the pavilions of the international green hall.

The circuit dedicated to the evolution of the sustainable sector, developed by our technical-scientific committee, also provides a full program of events that touch on the hottest topics surrounding innovation and applications in the various reference sectors.
