

Myplant and Garden

- 26 - 28 Feb 2020
- Rho, Italy

Myplant is an independent exhibition supported by a consortium of companies in the field and it is managed by an autonomous organization. This is how it can meet the needs of companies and operators. This is how it can become a tool for their business, renewal and visibility, through new stimuli, channels, markets, ideas, contact opportunities, products, projects and international solutions.

Since its debut, Myplant has become the great exhibiting hub for the sector, a “global space for business and relationships” for the protagonists of the green industry: companies and operators, with their expectations, needs, offers, previews and know-how.
